WALLING SYSTEM FOR SALE

WALLING SYSTEM DESIGN DESCRIPTION

The walling design was developed in 2010, identifying a market requirement for a high-quality system at an affordable price.

The thickness of 20mm offers therefore efficient storage and transportation. There is also fabrication of curved corner elements optimizing radius dimensions to achieve practicality, strength and optimum appearance.

A bonded frame system was developed for greater stability and suitable for outdoor use.

This system utilize Aluminum composite panels, clearly the best product for durability and offering a high gloss finish in various colors.

LED lighting is effective even in daylight conditions. No cable is visible.

The front side and back side walls are glossy white. They can be totally custom-made and the corners can be curved or not.

If you want to have your logo, we put it inside the panel.

If you want to create a nice stand or simply give a nice and neat look to a pit box, then you need to have walling system.

At PADDOCK Distribution, we create you walling system following your request and all custom-made.
